LASER RADIATION
DO NOT STARE INTO BEAM
CLASS 2 CONSUMER LASER PRODUCT
EN 50689:2021 IEC/EN 60825-1:2014
WAVELENGTH: 640-660nm
MAX OUTPUT: <1mW CW

LASER APERTURE
IEC/EN 60825-1:2014

LASER RADIATION
AVOID DIRECT EYE EXPOSURE
CLASS 3R LASER PRODUCT
WAVELENGTH: 640-660nm
MAX OUTPUT: <5mW CW

This product contains AAA batteries. Do not throw this product into the fire as the battery may explode; Also, do not immerse this product in water or any other liquid, as it may explode if the battery is short circuited or damaged.

I. Operation system

Supports Windows 10/11 and macOS 10.15 and later. On Android and Linux systems, only support laser and page up/down functions.

II. Package contents

1. Wireless presenter * 1 (USB receiver stored inside the wireless presenter)
2. User Manual * 1
3. AAA Battery * 1

III. Specifications

Transmitter

Technology：Radio frequency

Frequency：2.4GHz

Control Distance：100m

Laser Power：<1mW (Class 2) or <5mW (Class 3R), see the laser label on the back of the presenter.

Laser Distance：>200m

Wavelength：Red 640-660nm

Battery：AAA*1

Working Voltage：1.5V

Dimension：138.8*17.6*15mm

Weight：18.6g
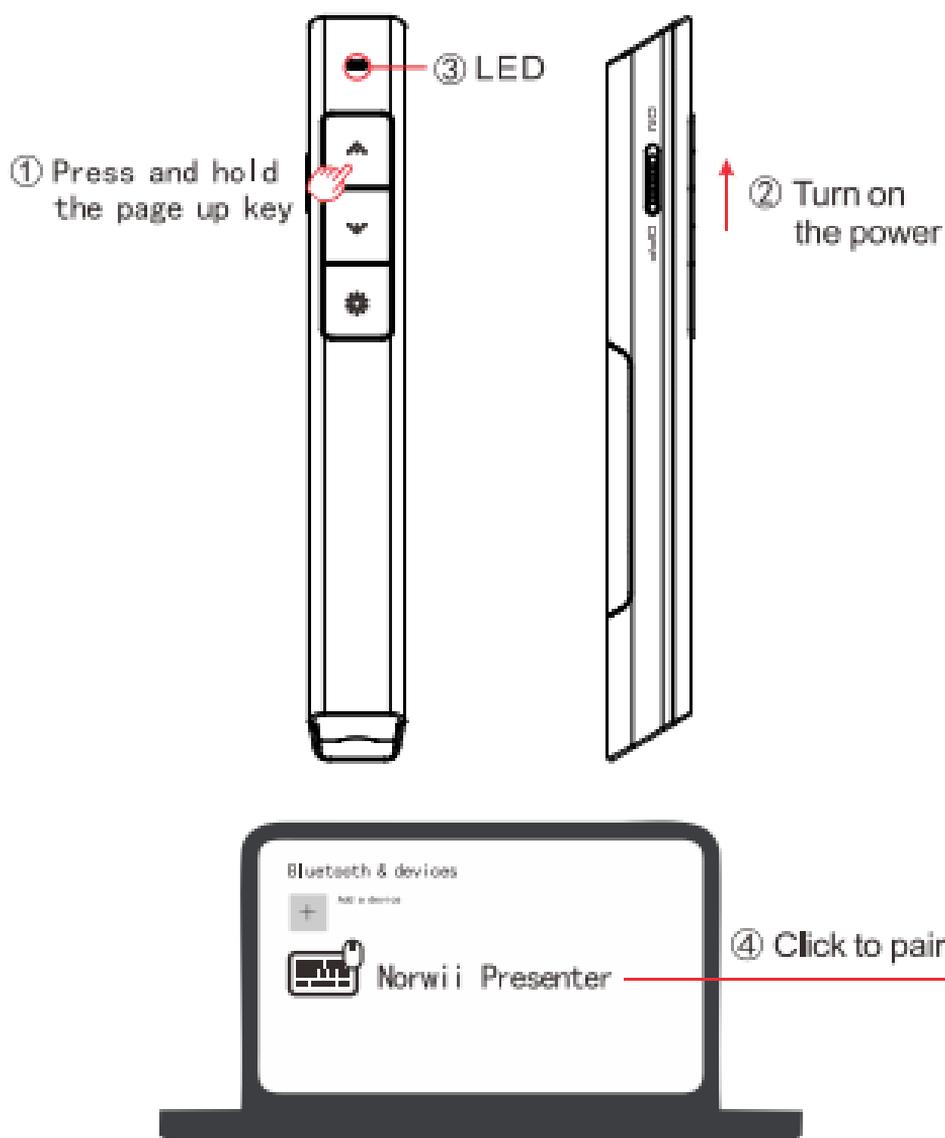

USB receiver

Working Voltage：4.5-5.5V

Dimension：24.7*13.8*5.1mm

Weight：1.6g

IV. Bluetooth connectivity

③ LED

① Press and hold
the page up key

② Turn on
the power

Bluetooth & devices

Norwii Presenter

④ Click to pair

1. Bluetooth connection on Windows computer.

1) On the computer, turn on the Bluetooth switch, click Add Device, and select Bluetooth as the device type.

2) Turn off the power of the wireless presenter, press and hold the

wireless presenter's page up key, turn on the wireless presenter's power switch, then release the wireless presenter's page up key. At this time, the wireless presenter's LED will flash, indicating that it is waiting for pairing in the following 3 minutes.

3) On the computer, find the "Norwii N26 BLE" in the "Add device", click connect, and at the same time, the presenter indicator light is off, and display "Norwii N26 BLE" connected in "Bluetooth & device". The presenter can now control the computer.

2. Bluetooth connection on macOS computer.

1) On the computer, select Bluetooth in the computer System Settings and turn on the Bluetooth switch.

2) Turn off the power of the wireless presenter, press and hold the wireless presenter's page up key,

turn on the wireless presenter's power switch, then release the wireless presenter's page up key. At this time, the wireless presenter's LED will flash, indicating that it was waiting for pairing in the following 3 minutes.

3) On the computer, find the "Norwii N26 BLE" on "Nearby Devices", click connect, and at the same time, the presenter indicator light is off, and display "Norwii N26 BLE" connected in "My Computer". The presenter can now control the computer.

3. Priority of USB receiver and Bluetooth connection.

The USB receiver has a higher priority than the computer's Bluetooth. After connecting the wireless presenter to the computer via Bluetooth, plug in the USB receiver, and the wireless presenter will disconnect from the computer via Bluetooth and establish a

connection with the USB receiver. Pull out the USB receiver, and the wireless presenter will automatically connect to the computer via Bluetooth. The wireless presenter cannot be paired with computer via Bluetooth when the USB receiver is plugged in.

4. Bluetooth wireless presenter and device reconnection.

The wireless presenter can store IDs for the 7 most recently connected devices (computers, iPads, phones, etc.). The USB receiver is not included in these 7 devices. After turning on the wireless presenter, the first device that sends a reconnection request with a signal strength greater than -10 dBm will connect to the wireless presenter.

For users: If a computer is among the 7 most recently connected devices, turning the wireless presenter off and then back on within 5 meters (16 feet) of the
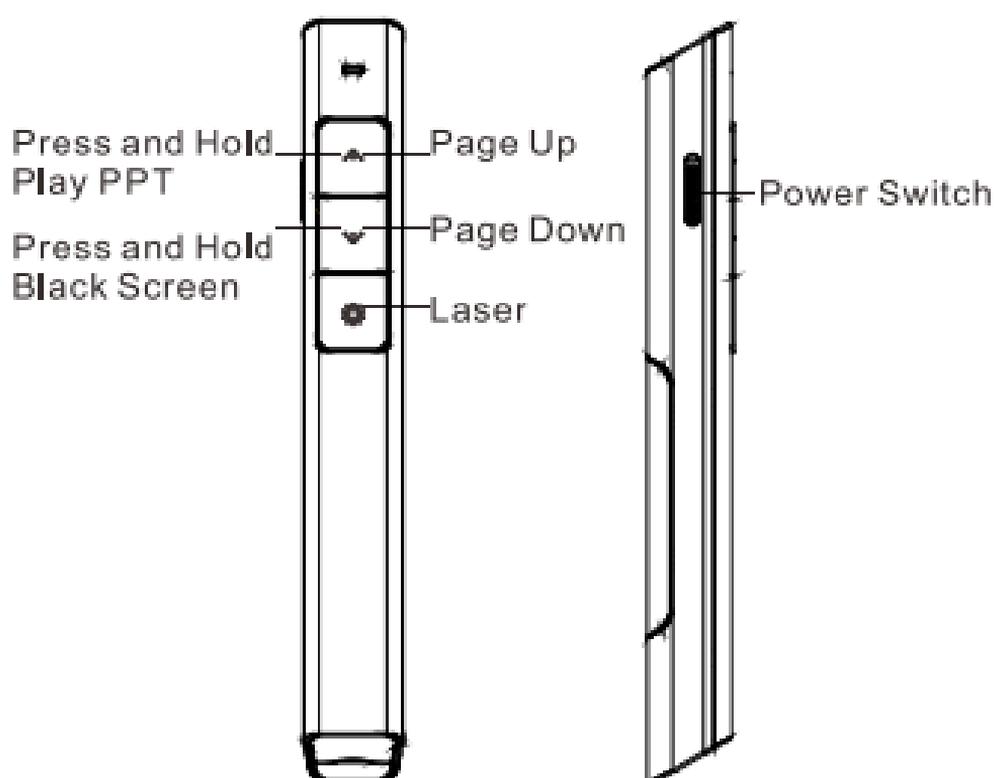

computer will automatically reconnect the wireless presenter to the computer.

5. To clear the saved device IDs from the wireless presenter:

1) Turn off the power switch of the wireless presenter.

2) Press and hold the laser key (for the N20 BLE, press the Tab key; for some products without a laser key, press the Pointer key).

3) Turn on the power switch.

4) Release the key once the LED blinks.

The blinking LED indicates that the wireless presenter has cleared all saved device IDs and has entered Bluetooth pairing mode. Users can perform Bluetooth pairing within the next 3 minutes.

VI. Function Description

1. Power switch: push up to "ON" to turn on the presenter, push down to "OFF" to turn off the presenter.

2. Page up key $\boxed{\wedge}$: click to page up, long press to play slides from the current page. Long press again to end slide show.

3. Page down key $\boxed{\vee}$: click to page down, long press to enter black screen, long press again to exit

black screen.

4. Physical laser key ☀: Press and hold to turn on the physical laser beam, and release to turn off the physical laser beam.

5. Function switching the page up and down keys.

Long press ⟨ and ⟩ simultaneously to switch between the four modes.

1) By default, the page up and down keys on the Bluetooth wireless presenter correspond to the left and right arrow keys on the computer keyboard, which is suitable for PowerPoint, WPS, Prezi, and Keynote.

← →

2) The first time you press and hold both the page up and down keys on the wireless presenter simultaneously, the function will switch to the Page Up and Page Down keys on the computer keyboard. This is suitable for image-viewing software.

PgUp

PgDn

3) The second time you press and hold both the page up and down keys simultaneously, the function will switch to the mouse scroll wheel function. This is suitable for some short-video apps and web browsers.

4) The third time you press and hold both the page up and down keys simultaneously, the function will switch to the up and down arrow keys on the computer keyboard. This is suitable for Word, Excel, and other applications.

5) The fourth time you press and hold both the page up and down keys simultaneously, the function will switch to the default left and right arrow keys on the computer
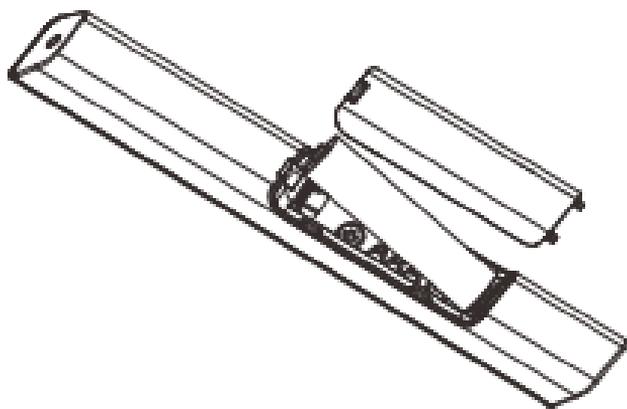

keyboard.

← →

6) After switching the function, it will be automatically saved. When you restart the wireless presenter, you can continue to use the switched function.

6. The page up/down keys can be customized by Norwii Presenter software.

VII. Installation
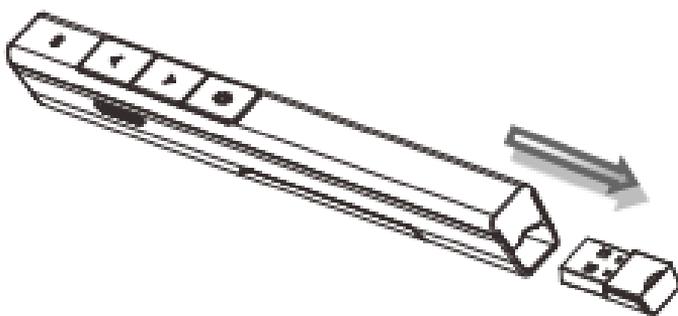

1. Install the battery

The product is powered by a No. 7 AAA battery. After opening the battery cover, place a No. 7 AAA battery and then close the battery cover (as shown in the picture)：
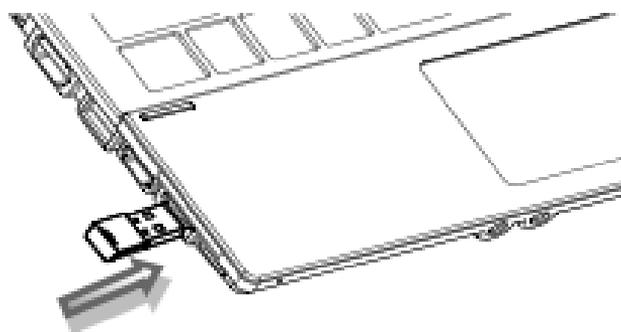

2. Take out the USB receiver and install it.

Plug the receiver into the USB port. The operation systems including Windows, Android and Linux will install the driver for the USB receiver automatically.

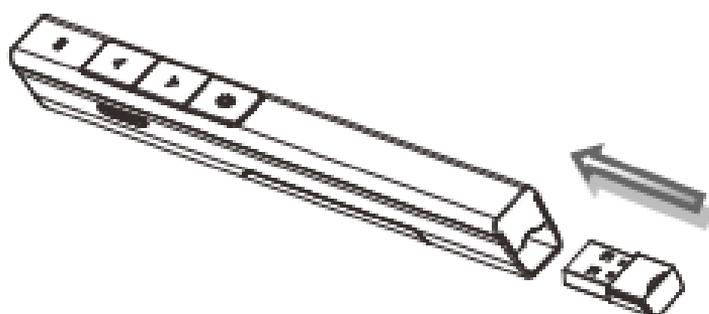

(Take out the USB receiver)

(The USB receiver into the computer USB port)

3. Control the wireless presenter by operating the key of the flip pen.

4. Turn off the wireless presenter.

VIII. Frequently Asked Questions

1. How to download Norwii Presenter software and how to pair the presenter and the USB receiver?

For products that support key function customization or highlight serial products that support digital laser, highlight, magnifier, you need to download Norwii Presenter software. Please download it from the "Downloads" under the "Support" menu of Norwii official website www.norwii.com in English version.

2. How to know if the battery is out of power?

When the power is turned on, if the laser button is pressed and no laser is emitted, it means there is no

power at all or the laser module is damaged and needs to be replaced. If other buttons are pressed and the LED indicator light does not indicate, it also indicates that the battery is out of charge. Please replace the AAA battery in a timely manner.

When the battery level is low, the indicator light on the flip pen will enter a slow flashing state, reminding users to replace the AAA battery in a timely manner.

3. Why does the laser pointer not work?

The laser does not light up, please check:

1) Is the power switch turned on? If not, turn on the power.

2) If the LED of the wireless presenter flashes slowly, it indicates that the battery is low and needs to be replaced with AAA battery

3) If other functions of the wireless presenter are normal and only the laser is not on, it indicates that the laser module is broken and needs

replacement.

4. What to do if the laser becomes dim?

The dimming of the laser beam is usually due to low battery power, and it is necessary to replace the AAA battery as soon as possible. If the laser beam is still just a red dark spot after replacing with a new AAA battery, it indicates that the laser module is aging. When the laser module ages, please contact us for after-sales repair.

5. Why does the computer do not detect the device when the USB receiver plugs into the PC?

Please check whether the USB works or not. You can use a USB mouse or keyboard to test the USB port. If a USB mouse or keyboard works on the USB port and the USB receiver of the presenter doesn't work, it means the USB receiver is broken or the USB drivers is not compatible with the USB receiver. You can try another USB port of the

same computer or USB ports of another computer to check whether the USB receiver is good or not. If it works on other computer, it means the USB drivers of the computer are not compatible with the USB receiver. You need to back up your data and reinstall the OS.

6. The laser is ok, and the USB receiver can be detected by the computer, why does the presenter control the computer?

The reason is the USB receiver doesn't save the presenter's address properly. You can use Norwii Presenter software to let the USB receiver to save the presenter's address again. We also call this operation is to PAIR the wireless presenter and the USB receiver.

7. How do you adjust the settings for Norwii Presenter on macOS?

On Apple's macOS, the Norwii Presenter software requires three permissions: Accessibility, input monitoring, Screen & System Audio Recording. If it has not been set before, please click "Grant Permissions" in the "About" tab of the Norwii Presenter software, and then open the corresponding permission settings in the window that opens. You can also check the box in front of the Norwii Presenter software in the above three permission settings in the "Launchpad - System settings – Privacy & Security – Accessibility, input monitoring, Screen & System Audio Recording" of macOS.

IX. Certifications

CE, ROHS, FDA

FCCID: 2AXGRN95

X. Declaration of conformity

This laser product complies with EN 50689:2021 and IEC/EN60825-1:2014/A11:2021. Complies with 21 CFR 1040.10 and 1040.11, except for deviations pursuant to Laser Notice No.50, dated June 24, 2007.
