## VI. Function Description

1. Power switch: push up to "ON" to turn on the presenter, push down to "OFF" to turn off the presenter.
2. Page up key : click to page up, long press to play slides from the current page. Long press again to end slide show.
3. Page down key : click to page down, long press to enter black screen, long press again to exit black screen.
4. Physical laser key : Press and hold to turn on the physical laser beam, and release to turn off the physical laser beam.
5. Pointer key : When the Norwii Presenter software is running, the following functions can be used:
  - 1) Digital laser: Press and hold the pointer key to use digital laser. At the same time, pressing  or  can increase or decrease the size of digital laser until it becomes a laser red dot or a red circle.
  - 2) Zoom in: Double click the pointer

key to switch to this mode, and the default magnifying glass will appear. Hold down the pointer key and press  to zoom in and press  to zoom out.

3) Highlight: Double click the pointer key to switch to this mode, and the white spotlight will appear. The page content outside the spotlight will appear in a dark gray state, while the page content inside the spotlight will appear in a bright white state to highlight the content inside the spotlight. Hold down the pointer key and press  or  to increase or decrease the size of spotlight.

6. Pointer key : without Norwii Presenter software, the pointer key has two modes: mouse mode and presentation mode which is switched by double click.

1) In mouse mode, clicking the digital laser key is a mouse click, which allows you to click on hyperlinks. Long press and hold the

digital laser key to drag the window.

2) In presentation mode, clicking the pointer key does not have any function, to prevent going to next page when clicked. When pressing and holding the pointer key, the built-in digital laser function in PowerPoint can be used in full screen mode.

7. Air mouse key : Press the air mouse key to move the cursor freely. Press the air mouse key again to stop the cursor movement.

8. Left mouse key : Equivalent to the function of a computer's left mouse key.

9. Right mouse key : Equivalent to the function of a computer's right mouse key.

10. Mark key : Click to enter the mark state, move the cursor to the desired location, hold down the mark key , and move the wireless Presenter to freely draw lines and circles on the screen. Release the mark key  to stop

drawing.

11. Eraser/Volume key  : click the Eraser/Volume key , you can erase the marks, and long press Eraser/Volume key , more than 1 second, then move the wireless presenter up or down, the volume will be increased or decreased.

12. The wireless presenter fully supports PowerPoint, Keynote, Prezi and other commonly used software. It supports page up and page down keys' function switching. The page up and page down keys correspond to the function of the up and down arrows on the computer keyboard by default and it supports page up and page down for PowerPoint and Keynote. For the first time when you press the page up and page down keys simultaneously, the function will be switched to the left and right arrows on the computer keyboard, supports page up and page down for Prezi. For the second time when

you press the page up and page down keys simultaneously, the function will be switched to the Page Up and Page Down on the computer keyboard, supports page up and page down for internet browser and Microsoft Photo software. For the third time when you press the page up and page down keys simultaneously, the function will be switches to the default up and down arrows on the computer keyboard.

13. The page up/down keys can be customized by Norwii Presenter software.

## **VII. Installation**

### **1. Install the battery**

The product is powered by two No. 7 AAA batteries. After opening the battery cover, put in two No. 7 AAA batteries and close the battery cover.

2. Take out the USB receiver and install.

Remove the USB receiver from the lower part of the wireless presenter, and then plug it into the USB interface of the computer. At this time, the bottom right corner of the computer desktop will display "Discovered New Hardware", and the system will automatically install the driver. When Windows displays "New hardware installed and ready to use", it indicates that the USB receiver installation is complete. The attached image is as follows:

(Take out the USB receiver.)

(The USB receiver into the  
computer USB port)

3. Control the wireless presenter by operating the key of the flip pen.

4. Turn off the wireless presenter.

After use, please return the USB receiver to the presenter's original

position and turn off the power switch to further save power. The attached image is as follows:

### **VIII. Frequently Asked Questions**

**1. How to download Norwii Presenter software and how to pair the presenter and the USB receiver?**

For products that support key function customization or highlight serial products that support digital laser, highlight, magnifier, you need to download Norwii Presenter software. Please download it from the "Downloads" under the "Support" menu of Norwii official website [www.norwii.com](http://www.norwii.com) in English version.

## **2. How to know if the battery is out of power?**

When the power is turned on, if the wireless presenter key is pressed and the LED indicator light does not indicate, it indicates that the battery is low. Please replace the AAA battery.

If the laser button is pressed and the LED indicator light is on, but the laser is not on, it indicates that the laser module is damaged and needs to be replaced.

## **3. What to do if the laser becomes dim?**

The darkening of the laser beam is generally due to insufficient battery power, which requires timely replacement of the AAA battery. If the laser beam is still just a red dark spot after replacing the AAA battery, it indicates that the laser module is aging. Please contact us for after-sales repair.

## **4. Why does the computer do not detect the device when the USB**

## **receiver plugs into the PC?**

Please check whether the USB works or not. You can use a USB mouse or keyboard to test the USB port. If a USB mouse or keyboard works on the USB port and the USB receiver of the presenter doesn't work, it means the USB receiver is broken or the USB drivers is not compatible with the USB receiver.

You can try another USB port of the same computer or USB ports of another computer to check whether the USB receiver is good or not. If it works on other computer, it means the USB drivers of the computer are not compatible with the USB receiver. You need to back up your data and reinstall the OS.

## **5. How to calibrate?**

Calibration is required when you do not move the wireless presenter, but the mouse cursor keeps moving in one direction until it stops at the edge of the screen. Another situation is when moving the

product horizontally or vertically, the mouse on the computer does not move horizontally or vertically, and there is an angle between the movement direction and the horizontal or vertical direction, calibration operations need to be carried out. Simply say, when you move the product horizontally, and the mouse cursor on the computer does not move horizontally, which requires calibration. The purpose of calibration is to provide a horizontal and vertical reference for the product.

Place the product on a horizontal and stable surface, press and hold the page down key  and turn on the power. The blue LED will flash to indicate entering calibration mode. At this point, release both hands and try to keep the product level as much as possible. The blue LED flashes for 3 seconds before stopping flashing, and remains on for 5 seconds before turning off,

indicating that calibration is complete.

**6. The laser is ok, and the USB receiver can be detected by the computer, why does the presenter control the computer?**

The reason is the USB receiver doesn't save the presenter's address properly. You can use Norwii Presenter software to let the USB receiver to save the presenter's address again. We also call this operation is to PAIR the wireless presenter and the USB receiver.

**7. How to adjust the settings for Norwii Presenter on macOS?**

On macOS, users need to add operation permissions of [Input Monitoring], [Screen Recording] and [Accessibility] for Norwii Presenter software under [System Preferences] - [Security & Privacy] - [Privacy]

## **IX. Certifications**

CE, ROHS, FDA

FCCID: 2AXGRN95

Declaration of conformity

This laser product complies with IEC/EN60825-1:2014. Complies with 21 CFR 1040.10 and 1040.11, except for deviations pursuant to Laser Notice No.50, dated June 24, 2007.
