This product can generate laser beam. DO NOT STARE INTO BEAM OR EXPOSE USERS OF TELESCOPIC OPTICS. Do not shine the laser beam on people's or animal's eyes to avoid eye damage! Do not give this product to children as a toy!

Warning label for red laser product:

Warning label for green laser product:

I. Safety warning

1. Please refer to the manual to use this product correctly.

 This product is equipped with a builtin lithium battery, and it is prohibited to disassemble, collide, squeeze or throw the product into fire; Stop using the product if the battery is swollen.

3. Do not place the product in a high-temperature environment.

4. Do not immerse this product in water or any other liquid.

 If short circuit fault occurs, do not continue using or disassemble without authorization. Please contact Norwii for assistance.

II. Instructions before use

1. Before using this product, please switch the input method of your computer to English input mode.

2. Please firstly run Norwii Presenter software on your computer to experience all the features of this product. Please visit Norwii official website www.norwii.com, then go to the "Software Download" page under the "Service and Support" to download Norwii Presenter software.

3. On Apple's macOS, the Norwii Presenter software requires three permissions: Accessibility, input monitoring, Screen & System Audio Recording. If it has not been set before, please click "Grant Permissions" in the "About" tab of the Norwii Presenter software, and then open the corresponding permission settings in the window that opens. You can also check the box in front of the Norwii Presenter software in the above three permission settings in the "Launchpad - System settings – Privacy & Security – Accessibility, input monitoring, Screen & System Audio Recording" of macOS.

III. Connection Methods

The Wireless Presenter has two connection methods: one is to connect to the computer via a USB receiver, which supports both USB-A and USB-C (also known as Type-C) interfaces; the other is to connect to the computer via Bluetooth.

1. The wireless presenter can be connected to a computer via a USB receiver.

There are 3 types of USB receivers: ①dual-head receiver, it contains two connectors, USB-A and USB-C, and has no USB flash drive; ② USB-A connector, it may have an internal USB flash drive; ③ USB-C connector, it may have a USB flash drive inside. There is only one type of receiver in a package, not two or more USB receivers at the same time. Which specific type of USB receiver depends on the choice made at the time of purchase.

 Turn on the wireless presenter power switch and remove the USB receiver from the end of the wireless presenter.

2) Plug the USB receiver into the USB port of your computer, 'New Hardware Found' will be displayed on the lower right corner of the computer desktop, and Windows will automatically install the driver. When Windows displays 'New Hardware Installed and Ready', it means the USB receiver installation is complete, and then you can control your computer through the wireless presenter.

2. Bluetooth connection on Windows computer.

1) Turn on the Bluetooth switch on your computer, click Add Device, and select Bluetooth for the device type.

2) Turn off the power of the wireless presenter, press and hold the page up key of the wireless presenter, and at the same time turn on the power switch of the wireless presenter, and then release the page up key of the wireless presenter, at this time, the display of the wireless presenter shows "**PHIF**" for 3 minutes which means that Bluetooth is waiting for pairing.

3) Find Norwii N95s BLE in Add Device on your computer, click Connect, after successful connection, the "PHIF" in the display of the wireless presenter will disappear, and it will show Norwii N95s BLE is connected in "Bluetooth & Device" on your computer. Then you can control your computer through the wireless presenter.

3. Bluetooth connection on macOS computer.

1) Select Bluetooth in the "System Settings" of your computer and turn on the Bluetooth switch.

2) Turn off the power of the wireless presenter, press and hold the page up key of the wireless presenter, and at the same time turn on the power switch of the wireless presenter, and then release the page up key of the wireless presenter, at this time, the display of the wireless presenter shows "PHIF" for 3 minutes, which means that Bluetooth is waiting for pairing.

3) Find Norwii N95s BLE in "Nearby Devices" on your computer, click Connect, the "PffI[" in the display of the wireless presenter disappears, and it shows Norwii N95s BLE is connected in My Devices on your computer. Then you can control your computer through the wireless presenter

4. Priority of USB receiver and Bluetooth connection.

USB receivers have higher priority than computer Bluetooth. After connecting the wireless presenter to the computer via Bluetooth, plug in the USB receiver, and the wireless presenter will disconnect from the computer via Bluetooth and establish a connection with the USB receiver. Pull out the USB receiver, and the wireless presenter will automatically connect to the computer via Bluetooth. The wireless presenter cannot be paired with computer via Bluetooth while the USB receiver is plugged in.

5. Bluetooth wireless presenter and device reconnection.

Initially, the Bluetooth presenter was designed to save only the ID of the last paired device (such as a computer, iPad, or phone). Every time the presenter was turned on, it would automatically connect to the last paired device. However, teachers often teach in different classrooms, which meant had to repeatedly pair the thev presenter with the computer in each classroom, a process they found We have received cumbersome. numerous complaints about this issue. In response, we redesigned the presenter to store the IDs of up to 7 devices (computers, iPads, phones, etc.), with the USB receiver not counted among these 7. Now, upon turn on, the presenter connects to the device that sends a reconnection request first and has a signal strength greater than -10dBm. For users. this means if the wireless presenter was previously connected to a computer via Bluetooth and is turned off and on again within five meters of the computer, it will reconnect automatically.

Click to erase the markup on the screen. Press and hold for 1 second and then move the wireless presenter up or down to adjust the computer volume.

8. Display.

 Unconnected Status: If the Wireless Presenter is not connected to the USB receiver or Bluetooth, the Wireless Presenter's display will show the unconnected status when the Wireless Presenter is powered off and powered on again, as shown in the figure below:

2) Wireless Presenter Disconnected Status: When the wireless presenter has been connected normally, if you unplug the USB receiver or turn off the Bluetooth of your computer, the display of the wireless presenter will show the disconnected status, as shown in the figure below:

 display will show waiting for pairing status, as shown in the figure below:

4) Signal Strength: The signal strength on the display is divided into five levels, with five levels being full, indicating the strongest signal. The lower the number of signal levels, the weaker the control signal. You can judge the current using environment and control distance by the signal strength. The figure below shows a signal of three levels.

6) Key indication: A finger symbol is displayed on the display when you press the key. as shown in the figure below:

7) Battery Status: The battery icon shows the percentage value of the remaining battery level. The lightning symbol """ is shown when charging and the percentage value is updated in real time. When the battery is fully charged, the battery icon will show

"100", as shown in the figure below:

9. Display Time.

This wireless presenter comes with a timing module, which can accurately time and show the time through the display. If the display time does not match the reality when using the wireless presenter, you can correct it by following steps:

1) Connect the presenter to the USB receiver.

2) Run the Norwii Presenter software on your computer.

 Enter the [Settings] tab of the software and select "Reminder Settings"

4) Enable the function of "For wireless presenters with OLED screen, synchronize time with the computer".

5) Turn off the wireless presenter and turn on again to synchronize the time.

10. Countdown Reminder.

1) Set countdown via the wireless presenter:

a) First turn off the wireless presenter, press and hold the pointer button, then turn on the wireless presenter, the wireless presenter will enter the countdown setting mode, a digital 00:00 will flash on the display, as

shown in the figure below:

b) When in countdown setting mode, click or long press the page up/down key to set the countdown time.

• Short press: Increase or decrease the countdown time by 1 minute.

Click Each click Increase the countdown time by 1 minute

Click Each click Reduces the countdown time by 1 minute • Long press: Increase or decrease the countdown time by 5 minutes.

long press in 5-minute increments Increase the countdown time continuously

long press in 5-minute increments Reduces the countdown time continuously

c) Starting the countdown:

The wireless presenter will automatically end setting and start counting down if there is no operation in 5 seconds. The wireless presenter will remind you by vibrating 0.5 seconds at 10 minutes, 5 minutes, and 0 minutes before the end of the countdown.

Turning off and on will not terminate the countdown within the countdown time. When the countdown time is exceeded, the countdown end and the display will return to the clock.

2) Set countdown via Norwii Presenter software:

Run the software, select "Reminder" in the "Settings" tab of the software, and

then select the predefined time option or input customized time. After setting up, a timer window will be displayed, click to start countdown. The screen timer can be reset, repositioned and resized, and redefined the color, as shown in the figure below:
